Education

Symbiosis Institute Of Technology, Pune Bachelor of Technology Robotics & Automation CGPA : 8.01	2023-2027
Senior Secondary Education (CBSE Board) 80.6%	2022
Secondary Education (CBSE Board) 86.8%	2020

Skills

Languages: Python, C++, SQL
Databases: Advanced Excel
Tools & Platforms: Git, GitHub, Power BI, Tableau
Data & ML: Matplotlib, NumPy, Pandas, Machine Learning, CNN, ROS, Nav2
Soft Skills: Teamwork, Leadership, Project Management, Communication

Experience

Pune 6/2025 – 8/2025

ISKCON volunteer

- Developed a Virtual Donation System in Unity where users can donate items equivalent to their body weight, creating an interactive donation experience.
- Implemented a weighing scale mechanism and real-time item tracking, enabling accurate and immersive virtual transactions.
- Enhanced user engagement by integrating interactive 3D visualization and dynamic feedback, simulating a real-world donation environment.

University Projects

- | | |
|---|------|
| SkillLens – Domain-Wise Skill Assessment & Performance Analytics System | 2024 |
| <ul style="list-style-type: none">• Built a multi-skill assessment system for Data Analyst roles (Python, SQL, Power BI, Tableau).• Automated accuracy and response-time evaluation to measure skill efficiency and readiness.• Created interactive Power BI dashboards with candidate- and skill-wise performance analysis. | |
| Semi-Autonomous Manual Intervention Cleaner Bot AtomQuest 2025 (Semi-Finalist) | 2025 |
| <ul style="list-style-type: none">• Developed a semi-autonomous cleaner bot capable of executing cleaning tasks with limited human intervention and supervisory control.• Integrated manual override mechanisms to ensure safety, reliability, and adaptability in real-world environments.• Recognized as a Semi-Finalist at AtomQuest 2025 for innovation, practical design, and effective problem-solving. | |
| Dimension Accuracy System with Real-World Visualization - OpenCV | 2025 |
| <ul style="list-style-type: none">• Developed a quality inspection system using OpenCV that automatically inspect the quality of tools and classify as accepted or rejected based on precise dimension measurements.• Implemented image calibration, contour detection, and perspective correction to measure object dimensions accurately.• Enabled users to visualize images in real-world scale while ensuring precise length, width, and height calculations for quality control. | |
| ROS2-Based Autonomous Differential Drive Robot with SLAM and Sensor Fusion | 2026 |
| <ul style="list-style-type: none">• Developed a ROS2-based control system for a differential drive robot using encoder feedback and teleoperation for real-time motion control.• Implemented a medicine dispensing application for hospitals, enabling autonomous delivery of medications to patients.• Designed the system for SLAM and autonomous navigation, enabling mapping and future path planning using LiDAR and Nav2. | |

EXTRA CURRICULAR /CERTIFICATIONS

- Attended **Advanced Machine Learning with Python** Workshop organized by Symbiosis Institute of Technology.
- Attended **Online Summer School on Data Science** organized by **Hertie School, Germany**
- **MATLAB Certification:** <https://matlabacademy.mathworks.com/progress/share/certificate.html?id=2ec9d892-eff2-47ff-bf3a-3248cc868fa3&>
- **Atomsquest hackathon 2025 Semifinalist certification**
- **Deloitte Data Analytics Job Simulation (Forage)**
- **Completed "100 Days of Code: The Complete Python Pro Bootcamp" (Udemy)**
